Welcome to Jump for Joy Music!

NAEYC CONFERENCE - THURSDAY NOV. 19, 2015 3:00-4:30 PM
ORLANDO CONVENTION CENTER ROOM W315B

Getting Smarter Through Music™

Encouraging the development of the whole child with songs that promote cognitive, social, and motor skills

For more songs and a free download: <http://www.jumpforjoymusic.com/academy/additional-songs/>

Infants are born with approximately 100 billion neurons

"Scientists believe that language is acquired most easily during the first ten years of life. During these years, the circuits in children's brains become wired for how their own language sounds. An infant's repeated exposure to words clearly helps her brain build the neural connections that will enable her to learn more words later on. Language can be learned a multitude of ways, like casual conversation, songs, rhymes, reading, music, story-telling and much more."

<http://umaine.edu/publications/4356e/> For more details and free downloads,

The importance of nurture

Laura E. Berk, in *Infants, Children, and Adolescents* Pg 255, Berk writes: "And as infants attend to the parent's face, & the parent talks and smiles, babies knit their brows, open their eyes to coo, & move their arms and legs excitedly, gradually becoming more emotionally positive until, between 6 and 10 weeks, the parent's communication evokes a broad grin called the **social smile** (Lavelli & Fogel, 2005; Sroufe & Waters, 1976). Social smiling becomes better organized & stable as babies learn to use it to evoke & sustain pleasurable face-to-face interaction with parent."

Stimulation is vital to survival of neurons

Experiences, physical, cognitive, and social-emotional, help to shape brain structures! Brain increases in size from 30% of its adult weight to 70% by age 2. *Op Cit pg 170.*

Still face video <http://www.youtube.com/watch?v=apzXGEbZht0>

Goals for today:

- Equip teachers with great new songs for preschool and K-6 levels
- Develop relevant themes which songs introduce
- Demonstrate easy motions which accompany songs
- Introduce supportive actions and activities

Sing along

Dance along

Play along

Follow up classroom activities

Participants will learn **8-12 wonderful songs** for use in the classroom. We will demonstrate easily learned activities including American Sign Language, art projects and field trips. Also included are following: - **Fun dance steps:** several songs have dance steps that can be learned in 15 seconds or less. - **American Sign Language:** Teachers will learn the signs for a sensitive ballad, with a tempo that helps the classroom energy wind down. - **Environmental and Social Themes:** Rock out with *What's That, Habitat!* (by Remy Rodden) as the whole group dances and sings together. *The Merry Go Round* tells a fun story that children can identify with. *Angel Peekaboo* is a fanciful song that engages the imagination and encourages movement. *So Many Ways to Be Smart* (by Stuart Stotts & Tom Pease) reminds us how intelligence can be evident in many ways.

Epigenesis

Laura E. Berk, in *Infants, Children, and Adolescents* Pg 88, Berk writes "Epigenesis means development resulting from ongoing, bidirectional exchanges between heredity and all levels of the environment."

Brain Plasticity

Norman Doidge, M.D., *The Brain That Changes Itself*, pg 226. Doidge writes "The left hemisphere generally processes the verbal-linguistic elements of speech, as opposed to the emotional-musical ones, and analyzes problems using conscious processing. Babies have a larger right hemisphere, up to the end of the second year, and because the left hemisphere is only beginning its growth spurt, our right hemisphere dominates the brain for the first three years of our lives. Twenty-six-month-olds are complex, "right-brained" emotional creatures but cannot talk about their experiences, a left-brained function. Brain scans show that during the first two years of life, the mother principally communicates nonverbally with her right hemisphere to reach her infant's right hemisphere." Pete the Cat - I Love My White Shoes, with little girls singing: <http://www.youtube.com/watch?v=HpZ9mOQ6iSU>

About the presenters-

Jump for Joy Music is Wiley and Debbie Rankin, plus their wonderful musical friends. Wiley performs at thousands of children's shows, where his infectious music and sense of humor draw in kids of all ages. He was featured with an original song on the Disney Channel. Jump for Joy Music, based in California, tours throughout the USA and England. Wiley has played his blues harmonica with the Yardbirds, the legendary rock group, and with jazz great Les Paul. Both ujhhave sung with Les at the Iridium Club on Broadway, in 2004 and 2007. Also Wiley played **Carnegie Hall** in 2004! Their CD, *Singing! Singing!* was awarded the **Children's Music Web Award** and they have been voted "Best of the Best" by the readers of Bay Area Parent Magazine.
